

QUALITY POLICY

The Organization's Quality Policy is a commitment to comply with the requirements of the quality management system and continually improve its effectiveness.

The principles of Quality Policy are:

- To ensure that the delivered product is in accordance with the Customer's contractual requirements, meets statutory and regulatory regulations and provides reliable performance for the purpose intended;
- To involve all employees in the improvement of the quality system and training them and developing their skills in order to get the job done 'Right First Time' thereby eliminating rework;

- To ensure that the quality objectives established by the management are pursued and reviewed;
- To maintain a Quality System that conforms to the requirements of ISO 9001:2008 Quality Management Systems.

The policy shall be made known to all Organization employees through open access to system documentation (electronic media) in all operations.

The Organization's Quality System shall be subject to ongoing audit, review and monitoring to ensure its continued effectiveness. The Quality Policy shall be reviewed by top management for continuing suitability.
